### **DETAILED ACTION**

Applicant's election of Het as a five-membered ring containing one Nitrogen and one Oxygen and Y as Hydrogen, and hypertension as the disorder is acknowledged.

The search of the elected compound specie of isoxazole has been expanded to include the compounds encompassed by Yanaka et al. (US 5,932,575).

Claims 6 and 8-10 are withdrawn from consideration as being drawn to non-elected species. Claims 1-5 and 7 are herein examined on the merits in so far as they read on the elected specie of isoxazole and the formula I compounds encompassed by Yanaka et al. (US 5,932,575).

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Base claim 1 recites a "method of treating or ameliorating an indication of an invention". This recitation is not clear. What is "an indication of the invention"? How is "an indication of the invention" defined? What is "the invention" set forth in this claim? Note that this phrase is vague and indefinite. Due to this indefiniteness the metes and bounds of the claims cannot be ascertained by the Skilled Artisan.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1617

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Yanaka et al. (US 5,932,575).

Yanaka et al. (US 5,932,575) teaches a method of treating cardiac diseases such as hypertensive cardiac diseases comprising administering to the patient a compound of formula I (which encompasses some of the compounds encompassed by formula I of the instant application) or pharmacologically acceptable salts thereof, see claims 1-9 and col. 6, lines 12-26 in particular.
